

NEW-YORK TRIBUNE.

LABOR MOVEMENTS.

LABORERS' UNION BENEVOLENT ASSOCIATION.

A most overwhelming demonstration of the four Divisions of the Association was held at Reilly's Hermitage Hall, corner Houston and Allen streets. The Chair was taken personally at the hour appointed, by Mr. THOMAS MCKEARNAN.—Patrick Tracy, Secretary. After hearing grievances, the names of several houses were given who had been giving the rates, and it was decided to do no longer, whose names we would publish and not keep them taken by the Society to expose all employers who would not fairly remunerate the hard-working laborer when all rates and necessities were so high.

On the appearance of Daniel R. Taylor, he was loudly cheered, and after being respectfully called, he addressed the meeting, giving a view of length as to the best plan to be taken, and they were unanimously adopted. The results of the meeting were:

Foreign Gold in bars (Standard).....per oz. \$3 17 9
Foreign Silver in bars (Standard).....per oz. 6 4 11
Gold Coin, Portugal patais.....per oz. 3 17 4
" " Doubloons, Potosi.....per oz. 3 15 0
" " Spanish.....per oz. 3 15 6
" " Napoleons.....per oz. 3 15 6
" " 10 Guider pieces.....per oz. 3 15 6
Silver Coin, Mexican and S. Amer. Dons. per oz. 6 4 11
Spanish Pillar Dollars.....per oz. 6 4 11

There has been a considerable amount of active business in the share market. A strong rise in prices of the various shares usually dealt in had taken place, which has been caused chiefly by the accumulated "bear" account requiring to be settled. The magnitude of the bear account has been increasing for several accounts back, and has at last broken down by its own weight, carrying with it two parts, the one a broker, and the other a jobber, in the share market, who are placed *long* or *short* by the rise in prices which has recently taken place. The receipts lately have been satisfactory.

The reports from the Manufacturing Districts begin to be rather improved in tone, and the price of goods at Manchester is gradually creeping up to a point more in par with the cost of the raw material. This effect has been produced by the continued accounts received from the American markets relative to the deficit in the yield of the past season, which has rather lessened the caution of the buyers for foreign markets. Trade at Manchester is held in full and prices heavy; the raw silk is as inactive as for weeks past, but raw silk firm, with considerable business doing. The Worsted trade at Ribbles is steady, and a fair amount of business is going forward in Leeds, prices being pretty firm.

The *Bunkers' Magazine* says: Connected with the subject of railways is the history of the Exchange Banks, established in Scotland in 1845 and 1846, for the purpose of making advances on railway property; most of these banks have failed. We observe that one of the largest of them, the Commercial Exchange Bank, at Glasgow, held a meeting on the 22d for the purpose of dissolving the company. The report of the investigating committee describes a loss of £131,670. A very curious chapter of banking experience it is to be gathered from the failure of these concerns.

The following was the condition of the Bank of England on the 24th May:

The Banker's Magazine quotes the following Bank returns for the week ending May 11:

	Bank	Bank	Bank	Bank
